

2017 CORE PROGRAM UPDATE – ROMANIA

Gift of Life International has implemented its fourth Core Program at Grigore Alexandrescu Hospital (GAH) in Bucharest.

The Romanian Ministry of Health and the City of Bucharest have invested in the creation of a state-of-the-art pediatric cardiac unit at GAH which opened in September 2016.

GOLI global partner Save a Child's Heart (SACH) has provided initial training to Romanian healthcare professionals at the Wolfson Medical Center in Tel Aviv, Israel. This skills transfer will be enhanced during the scheduled training visits to GAH in 2016 and 2017.

Children with more complex heart ailments will be treated at SACH's Wolfson Medical Center, while lower complexity cases will be treated at GAH.

Gift of Life International affiliate GOL Romania will provide logistical support and help to oversee the program.
