

TURNING DESPAIR TO HOPE IN

Kosova

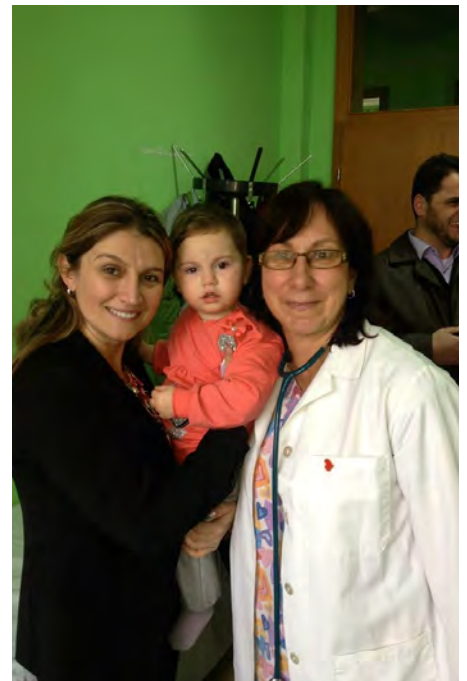

2012 - 2014

A COLLABORATIVE EFFORT OF LIKE-MINDED ORGANIZATIONS

Providing Hope in Kosova Where Once There Was Only Despair

Children in need of cardiac surgery in Kosova cannot find treatment within their own country. At the request of our Gift of Life Kosova program, Gift of Life International coordinated the first screening mission to Pristina, Kosova, in May of 2012 with a second screening mission in March 2014. During these missions, 184 Kosovar children were screened and over 40 children have now been treated, thanks to the efforts of affiliated Gift of Life programs and hospitals. Kosovar children currently living in despair, not knowing where to turn for help, will be given hope and a second chance at life thanks to our global network of caring medical professionals, Gift of Life programs and partners.
